Editorial

UNNECESSARY AND INADVISABLE

The fact that no business of an important nature reported to have been brought up at a recent is reported to have been brought up at a recent meeting between Linday's industrial commissioner and members of Linday's (Council does not excuse the exclusion of the press from the meeting. Such approaches, in the light of past experience, is not only unnecessary but extremely inadvanced that all town the proof of the confirmation of the confi

citizens' welfare when taken into the confidence of those charged with administering the town's affairs. There is not the slightest need for any local adminis-trative body to fear the press where its motives are

Others Say

THE CABINET CHANGES

THE CHAINET CHANCES
The retirement of Mr. Harold Scott from the post
of Minister of Lands and Forests closes six years of
useful service in this important portfolio. Under his
guidance, a number of valuable innovations were introduced, and sound policies were carried forward. To
take his piace, Mr. Weiland Genmell, who has been
Minister of Minister for the last three years, has been

the occasion has given Premier Frost the oppor the occasion has given Premier Frost the oppor-tunity to promote a "new" member of the Legislature to Cabhet rank. He has made Mr. Philip Kelly, who has represented Cochrane North since the election last November, the Minister of Mines. Mr. Kelly comes to this responsibility with high recommendation. "He has an important job to do which, as a lifetong resi-dent of the North, be will apprecad with familiarity and the continuous." We deed sure that his appointment and the continuous of the control of the control of the manufacted descriptors: His manufacted descriptors. his many-sided department. His capacities will soon become apparent in the conduct of his duties.

necome apparent in the conduct of his duties.

These changes do not, of course, represent the
Cabinet remaking expected after the election, but which
has not yet taken place. Some appraisal of new talent
in the considerable majority of the Government was
possible during the last session. Undoubtedly, there
or the considerable majority of the Government was
wise outlook. The for their enterprise, energy and
wise outlook. The for their enterprise, energy and
wise outlook. The for their enterprise, desired to avail listed of sauch qualities in the interests
of progress and good government—Globe and Mall

Laugh It Off...

The baby-sitter was pushing the baby carriage along a path in the park when a policeman strolled up. "Fine-looking baby." he said. "How old is he?" "He'll be a year next week," answered the baby-

"He doesn't look that old," said the policeman.
"No" replied the baby-sitter. You see, he was very
young when he was born."—Lahour Leader

Before You Vote for a Beverage Room in Gooderham

THINK OF WHAT MAY HAPPEN

1. Children will be deprived of clothing, food and proper home necessities; for the days wages will only buy so much.

materially to child neglect, broken homes and unhappy parenthood. Children's Aid workers are reporting that 98 per cent and over of their

Beverage rooms tend toward accidents. Drinking drivers are a hazard to child safety.

4. Beverage rooms present an added attraction for youth and it creates n unwholesome condition among our young people.

Before you vote, think of what it will mean to the boys and girls to have public licensed places selling beer. Everywhere, freer sale has meant increased drinking.

To vote for beverage rooms is to vote for what is no longer a popular means of sale. There are more people opposed to women's beverage rooms than any other form of outlet.

7. In beverage rooms is found one of drinkings greatest problems, the treating system.

A vote for a beverage room means voting for the opening of any number of beverage rooms in our township.

NO ONE CAN SAY THAT THE SALE OF BEER WILL MAKE THIS COMMUNITY BETTER, HAPPIER, OR MORE PROSPEROUS

Place an X after "NO" on your ballot.

Here's a Challenge Only FERGUSON

Dares to Make!

As the Ferguson Dealer in this community, we will publicly match the new and far more powerful Ferguson Twenty-85 against any other tractor. We dare to do this because the new Ferguson Twenty-85 is bigger in power, in performance, in economy! At a "Showdown" demonstration we will prove that the Ferguson Twenty-85 with Ferguson System Implements, meets more of the needs of more of the farmers . . . more of the time . . . than any other tractor . . . outperforming them doing all of the following jobs:

Moldboard Plowing Harrowing, Tandem Disc Harrowing, Spike Tooth

Mowing Hay Row Crop Cultivating

Harrowing, Spring Tooth

Field Tilling Subsoiling

Side Delivery Raking

Loading & Spreading Wood Lot Sawing

There you are, farmers! .The stage is set for a "Showdown." We know we the best tractor in the world and we're ready to prove it to you.

CAMERON GARAGE

CAMERON, ONT.

prove these claims at a "Showdown" demonstration on your own farm. Then get in touch with us.

Match these jobs a Ferguson Tractor can do with Ferguson System Implements against similar jobs any other tractor claims to do . . . and you'll see we can do those jobs better with our new Ferguson Twenty-85. And we'll ask you to be the judge of how much better we do them.

CANADA SHOULD NOT BE INTIMIDATED

TELL THE TOURIST THE TRUTH

Tall THE TOURIST THE IRUIH
A report circulated Monday and credited to the
Ontano Department of Higosaya declared that to
in the Province are all ready for the tournet.
The report went on: "The department says the
the report went on: "The department says the
one month earlier than usual. Resortating and patchi-

that many Outario highways are in bad condition.

No propaganda is more potent than that spread

via the graperine and for this reason official pronouncements to prospective touriest should be strictly facusal

--nor futural. Failure to observe this principle could

THIS TREND IS UNDESIRABLE

THIS TREMO IS UNDESIGNABLE
There is a movement underway in Western Ontatio to give the touries some preferrotial treatment
insofar as parting meter violations are concerned. This
revolutionary policy has been adopted by Woodstock
and is now threavening to spread. Under its terms the
fouriet is given so-called 'courteey keys' which exempt

and a now threatening to speed, there is been the sample formula given so-called "coursels leave" which earning from the first so was a second of the sample from of his stay. The privilege is extended to tourists any place outside of Ontario.

With all due respect to the tourist and without say feeling to see fourists shown anything but coursely, see wheme issues which cannot fall to lik the local residents. It is a plan which should be discarded be-relations between tourists and the criticary it is all-more corrain to cause surfic.

It is extremely unwise for any municipality to make exceptions to local by-law walk and even-free the first step in making the by-law weak and even-free the first step in making the by-law weak and even-free the first step in making the by-law weak and even-free the first step in making the by-law weak and even-free the first step in making the by-law weak and even-free the first step in making the by-law weak and even-free the first step in making the by-law weak and even-free the step in the first step with a total stranger is given a free hand to violate the law?

LEVEL CROSSING TRAGEDIES

LEVEL CROSSING TRACEDIES
Another level crossing trapedy in the Lindsay area formess attention on the need for particular care when approaching a railway crossing.
There have been two fatal accidents at the first railway crossing out of Lindsay and the Peterboroush highway and yet it could not be termed an unisually abactious crossing as level crossings as level crossing several numbers test back from the approaches. One would think that these signs should be ample warning to motorists to be on the alert but it is apparent that they are not sufficient to arrest the attention of everyone and the question arises: How can these danger points be indicated so as to register with every passing

driver?
Pending the finding of the answer to that question about the only thing which can be done is to appeal to motorate to be on the lookout for crossing sugas and head them. Most of these crossing signs acommed a speed finith of 29 miles per hour and it might surprise a number of drivers to learn how long it takes to bring a webliet to a stop even at this speed and

Every level crossing is a point of danger and there are few train-car collisions on record which ended favorably for the car,

Others Ask...

ARE WE HÉADING TOWARD A WELFARE STATE?

It might be said the farmers have arrived there (the wifare state) with all their price supports, government controls, and assistance—they are no longer free men and are fast becoming wards of the state, supported

and are fast becoming wards of the state, supported by the state.

Recently some members of parliament once again have been advocating government help and supports farmers' assistance.

Fair enough argument for "Welfare State" thinking, but two wrongs do not make a right. It should be pointed out again and again—Governments produce no wealth—they can only take from one to give the parliament of the parlia

to another, and in the finite analysis they do not dis-tribute wealth, but rather, poverty.

A nation's strength does not lie in what the gov-ernment owns but in what its people own.

The sinews of production are not dollars. They

the world's finest baking oven bread baked by

"INFRA RED RAYS"

The most scientific modern equipment, which bakes bread on a new improved principle, has been installed by your Trent Valley Baking Company, Limited, to give Linday the world's best-baked

In our new oven, infra-red rays penetrate right to the centre of loaf, baking it evenly throughout. The temperature is accurately controlled, and kept at a constant level. No other system of baking can give bread the same uniform quality, the same even texture. It produces the finest and most delicious bread you have ever tasted.

Your bakery has never spared expense in giving Lindsay the best bakery products advanced methods can produce. This latest improvement is in line with that policy. There are but five intra-red ovens of this type in the world today, and Lindsay has one of them

The new INFRA BAKE loaf is brought to you through the same friendly delivery system that has been serving you for so long.

Early this fall, your bakery will hold "open house" to enable you to inspect this revolutionizing

OTHERS SAY

ALL IS NOT WELL...

There is a growing uneasiness in the minds of a number of redders in villages surrounding Lindsay whose children of high school age will shortly commone travelling long distances to Lindsay Collegate to complete their education. From conversations with the parest of many of these teen-ages in the district it is apparent that they are not all pleased with the

The distaste for the enlarged high school area

The distasts for the enlarged high school area arrangement with rates is, it would appear, not due to any any desire on the part of the affected purents to returnil Industry's ambitions. It is based on what seems to be genuine concern for the future welfare of their children and of their own communities.

One of the things which concerns them most is the great length of time which these young people will be away from home during the day. It will be accessary for some students to travel 25 young people will be average for some students to travel 25 miles will mean that their time at home will be greatly restricted and by the same token, the ergicle of parental supervision. the same token, the period of parental supervision

Another thing which concerns these people great

a generally unsatisfactory arrangement.

Several parents in the affected area feel that a grave mistake is being made in consolidating high school training units and that steps should be taken ow to halt or at least modify the move before it is

Perhaps one of the outstanding grievances arisins out of the situation is that the people to be affected claim they had no real voice in the matter. It is con-tended in some quarters that the issue should have been put to a vote of the parents of high school chil-

One thing emerges clearly from contact with people in the affected area; there is not universal, and doubtful majority, endorsement of the plan. It therefore must be asked: is a great mistake, one which infringes on the rights of parents, being made in pursuing high school

IT ISN'T ALWAYS THE MOTORIST'S FAULT:

Earlier this week an incident was witnessed on William Street North which should be recorded for the benefit of all parents of children who ride bicycles.

Here it is:

Two boys on one bicycle, one riding the handle-hart, were proceeding south on William 8st, above the hard war proceeding south on William 8st, above the hard war hard war

at the reaction of the driver.

Now, if those boys had been hit and hurt, who would have been held responsible or at least blamed by their family? Quite probably the motorist and yet in this case it would have been pointing the finger the wrong way.

The incident serves to stress the need for parental instruction to young cyclists and insistence that they demonstrate their ability and willingness to co-operate demonstrate their ability and willingness to co-operate in traffic by riding safely. It might be a good idea if bicycles were given a free license here so that in-stances of dangerous riding could be reported to parents and dealt with in a suitable manner.

THE TIME HAS COME... The time has come when Lindsay citizens may begin to take hope that the days of a disorderly garbage dump at the northwestern entrance to the town see nearing an end. How soon the situation can be remedied is largely a matter of how quickly a committee amounts of the property of the second of the secon tee appointed by Lindsay's Council can make arrange-ments for new refuse grounds.

.

ments for new retuse grounds.

The present municipal dump has been the target of the present and it has mounted in temporal to the present and it has mounted in tempo sition move the present and it has mounted in tempo sition provides a facilitation on the distribution of the arcsis of a full-time carcataker, in addition to the unsightly appearance of the dump and its distorderly contribution to the arcs surrounding it, there are occasions when dense smoke from fires thereon consultations a definite highways traffic heazerd. When the wind blows the opposite way the smoke which belches forth from the smouldering fires could hardly be con-sidered a contributing factor to the health of the town.

One of the tasks of the committee appointed will be to interview members of Ops Council to see if the town can obtain authorization to dispose of their gar-bage in the area adjoining the town's sewage disposal plant. At first glance this would appear to be a good location for a garbage dump although the area has a certain natural beauty which should not be ruthlessly destroyed. If the township does agree to let the town use a portion of the area for garbage disposal, (and it is to be hoped it does), it would be well advised to insist that the work be carried out on an orderly basis.

insist that the work be earlied out on an orderly basis. Pailure to procure the rights in this area would be a procure the rights in this area. The second of the second o

NOW IT'S WEAREVER CLOIM
It tooks as if the textile industry, which has been
in a slump in Canada, Great Britain and various other
countries in recent years, is going to take another and
perhaps worse beating than it has ever had.
At least, that is what is suggested by an announcement in the United States than an indestructible cloth

market.

We are not golpg to diamiss this business about Indestructible cloth a nothing more than extravagant advertising, because its manufacturers are duPont de Nemours, a name with very considerable prestige.

—Outarlo Intelligencer

THAT NORTHERN LIGNITE

Possible use of the lignite deposits in Northern Ontario for electrical power development purposes, or the manufacture of plastics, was intimated by Premier

Jand Kalway.

Premier Frost said that scientific research is being made into the methods by which lignite can be used. If the present Ontario government succeeds in putting the lignite beds to work it will be an accomplishthat has baffled past administrations at Queen's

Park.

The major difficulty to be overcome is the extraction of the water from the fuel so that it will burn, and apparently the cost of extracting the water outwelghts the economies that might be effected by the use of lignite.

the use of lignite.

Northern Ontario hopes that research will be able
to find ways to bring about the economical development
of the fuel—but the experience of the past 25 years
has planted little seed of encouragement.

MOSQUITOES CAN GET ALONG WITHOUT US, BUT WON'T

The days in June may be rare but here in Orillia and district they bring the occasional mosquito as well as the Joys of warmer weather, sunahine and summer sports. Efforts of the Board of Works to keep mosquitoes down to a minimum are much appreciated but there are always enough akedters escape There should be interest, therefore, in a news item which explains that mosquitoes can get along very

which explains that mosquitoes can get along very well without on humans and we wish they would. This doesn't seem to carry any weight with Mother Nature. According to an Ottawa correspondent, Canadian selentists have now exposed the mosquito as a criter who lives on nectar as his standard fare and goes to the lives on nectar as his standard fare and goes of a peat it becomes. A blood dist increases the number of a peat it becomes. A blood dist increases the number of sges laid and the offspring is more vigorous. The Agriculture Department selence service division of estomology, assisted by the Chaik Tilver atomic plant and the National Research Council, has exposed the mosquito in all fits villainy.

The National Research Council has exposed the mosquito in all fits villainy.

The National Research Council has reposed the mosquito in conquito, a particularly viclous the Northern mosquito, a particularly viclous the Northern mosquito, a particularly viclous the mosquito is a misery to those who come within its range, from humans to lemmings.

range, from humans to lemmings.

range, from humans to lemmings.
The question was how these insects survived when there was no blood available in the barren wastes where so many millions of them were found. It was believed that like the bee they searched for the nector in flowers, when there was no way of satisfying their blood lust.

In the arra under study, flowers such as the North of the control of the cont radioactivity. It was proved that 75 per cent of these mosquitoes had dipped into the flower nectar and carried away traces of radioactivity to expose their operations when they come under the eye of delicate

instruments.

One thing leading to another, the scientists now examine the possibility that some mosquitees live on blood alone, that is, if they had their residence in areas with large populations of humans or animals. The proof seems to have been given that some species can survive without blood. But—and science offers no consolution to suffering summer humanity—every mosquito seems to prefer blood if he can get it.—Orilia Packet and Times

BE SURE CAR IN GOOD SHAPE

BE SURE CAR IN GOOD SHAPE

The summer driving season is coming up, if it is not already at hand. Generally speaking it means a difference in motor driving practices.

Through the winter, driving of motor vehicles has been largely on a business basis and much of the traffic has been exclusive to the city strests where the intersections, the stop and go lights and conditions generally create the necessity for moderate speed and company company care.

constant care.

The cisil of the summer is for the long road trips,
Iragely for pleasure, and, as the open roads constitute
also an invitation to speed, there comes a new and
additional need for vigiliance and care. This is not
by any means confined to actual driving. It includes
what is probably equally as important, the condition
of the car

It is also to be remembered that, often, on these long trips the driver may be far from a service station.

It follows that the car should be in first class condition in all respects, as regards brakes, the motor, oil sup-plies and tires. This is the season above all others when owners and drivers should have the expert attention of the service garages in order that they may have maximum protection for use of both city and rural roads.—Oshawa Times-Gazette One Red Invention We Won't Adopt

"The die has now been cast"

An American manufacturer was planning! to open a plant in Canada. He considered various locations and found what seemed a likely site. He talked to a local bank manager, got facts about the community and its facilities. Some time later the company wrote to the banker:

"The die has now been cast. It is our intention to locate in S . . . We feel that it is well suited to our particular operation. You have been of great aid to us. Your accurate and rapid presentation of facts necessary to reach a decision was top-notch."

Such letters show how a branch bank serves not only its own depositors and other customers but how, by assisting business development, it benefits the whole community.

ACTION NOV....

ACTION NOV....

So contributor writing over the signature "Action now" has appealed for the development of some effections of the second of the property damage, coupled with the mental heard entailed for those who survive these tragedies, in such as to warrant the taking of any econodrically practical step to eliminate these disasters.

The need for some real connectivation on the level crossing problem and entry of large-scale diesel train courtings. The research coal-fired documents is more contributed.

emphasized with the advent of large-scale observance operations. The present coal-fixed locomotive is more conspicuous in transit than the oil-burning dieselfs which glide over the ralls with a minimum of show. For this reason it is possible that motorists will be even more susceptible to the dangers attendant upon level crossings when diesel trains come into wider use are in blanned are.

However, regardless of the application of mo devices to warn motorists of the approach of trains at level crossings and the proximity of the crossings themselves, nothing will ever be invented which will do away with the necessity for being observant. Re-gardless of how effective the warning apparatus is, it will still be necessary for the motorist to keep eyes and ears open to dangers attendant upon level cros-sings. The first step in eliminating crossing accidents is for the motorists to obey existing warning signals.

Others Say

HORSE-TAIL OF THEIR HAIR
Americans take their politics much more demonstratively than Canadians. It is almost necessary,
even for a social introduction, to give one's party affiliation with one's name. "Mrs. Katz, meet Mrs.
Dawgs, Republican." But since the Americans are an
ingentious people even in tester politics, it may not be
margarious people even in tester politics, it may not be
accommanded to the control of the control of the Control
strategies of the Security of the Republication.

adherent of the Democratic donkey, nor Mrs. Dawgs as a supporter of the Republican slephant.

A halt-dresser in New York has invented a colificative with the control of the control of the colificative with the colificative to all and sundry. The Republican styles angeseting an elephantic ears and trunk, is attained by a roll of sort curis on either side of the head (for the velophantic sears), with a center roll of curis (for the trunk). Democratic holies should wear a variation that the control of the colification of th

Need a

LUMP SUM

QAL usually comes disaper in the good old summer time. But, for many of us, it's often a problem gerting those dollars on the line right new—to take advantage of today's lower prices. That's where a B of M Coal Loan can be so handy.

That's more a both going's good, you should see the manager in your neighborhood branch of the Bank of Montreal. If you have an assured income and can repay a loan in nine monthly inestalments, or less, the B of M will, gladly underwrite your coal bill.

To take advantage of seasonally lower prices . . . to be sure of your full supply . . . to get your coal delivered dry . . . and to be soug — and smug — next winter when the last-minute rush to the coal dealer is on . . . see the man in "NY BANK".

And why not do it today while you have it in mind?

THOSE LONG MEETINGS...

Those long meetings are becoming the rule and not the exception with Lindsay's Council again. There was a period a couple of years back when long meetings were in vogue and at that time it was found desirable to hold two regular meetings of Countie of monthly and one committee meeting. This proved on the country of the countr cu monthly shu one committee meeting. The process to be unpopular with the succeeding council and the procedure was dispensed with. For a while the business of council was handled with dispatch and adjournments came at reasonable hours—10:30 or 11:00

Journments came at reasonance nours—11.230 Or 11.200 pm. Lately, this cread has been reversed and the mid-night and after meeting has become aimost routine. The principal reason for these priotoged meetings in not obscure and in the igiterests of the ratelysman of a electranized effort should be made a electranized effort should be made pointered to the principal superior of the principal superior and the principal superio to the various matters which arise. It is not intrequent that discussions are prolonged just for argument's sake, long after the obvious solution has been arrived at. There is little doubt but what the meeting time could be greatly reduced and the town's interests more efficiently served if needless word-pisy were eliminated.

TAY LOAD MAY SOON RECOME BURDEN

TAX LOAD MAY SOON BECOME BUNDEN
There is every indication that Linday's tax load
may soon become a burden . . . a burden that the
majority of taxpayers aren't going to relish. Recent
developments within the town such as the completion
of several public school additions, the sewage disposal of several public senson additions, the sewage unposar-plant, street re-paying and so forth have now pro-gressed to the point where pay day is at hand. Natur-ally, before anything can be paid for the money must be found and in the case of municipal governments the most of its money comes from only one source
-taxes. Thus the taxpayers of the town are shortly to be called upon to dig down and produce the neces

sary cash.

The town's tax collector's report earlier this week indicated that even at their present lawel, taxes are not as easy to callect as one might imagine. A significant rise in itax arrears in recent months indicates that the role of the atrapars is getting more difficult to play. It will not be surprising, therefore, if some real difficulty is experimented collection that we have a significant to the stress have been tacked one.

Bechanics were activated as findays "OMD.

Bechanics were activated as findays."

the extras have been tacked on.

Perhaps such extravagances as Lindsay's "Old
Home Week" fasco and other "money-down-the-drain"
projects will not make such popular joke materials
when the sobering effect of rising tax bills is fully felt. Much of the money wasted on such nonsense would have been very useful now in alleviating some of the fax burdens which confront an expanding munici-

Vacation time is just around the corner for hundreds of families within the reading zone of this

newspaper and its approach prompts a note of caution Holidays for many families mean boating, swim-ming, fishing and other activities at the lakeside. This in turn means that families are exposed to dangers to they may not be as alert as might be desired And this suggests a need for proper regard for the basic principles of safety coupled with adequate super-vision by senior members of families over the younger

are contemplating doing something of a risky nature while around or on the water. They realize it is fool-ish to dive into strange waters; that they shouldn't stand up in a boat; that swimming should not follow immediately after a meal; that great care is needed in using fishing tackle while others are about; that an inexperienced person should not venture out in a

an inexperienced person should not venture out in a boat; that swimming alone is not be wisest thing to do, and a number of other things which fre-quently lead to trouble. Being possessed of this in-stinctive knowledge then, it is up to adults to pass it along to youngsters and apply it in the interests of their own safety.

Before going on vacation it might be a good idea to stock up on basic first aid supplies to treat the results of probable minor misadventures such as cuts, results of probasely minor impactant with poison ivy, etc. It might also be a profitable plan to become familiar with artificial respiration procedure in order to render prompt help to victims of water disasters.

Thus equipped the vacationing family should be in a position to deal with many of the emergencies which are apt to arise while holidaying. However, prevention is still superior to cure and the whole family should co-operate in the interests of safety so that their holiday would be as it should-a happy one

QUEEN STREET GREATLY IMPROVED

Local citizens having occasion to travel along Queen Street within the past few days probably have been impressed with its improvement since spring widening of the street has greatly facilitated ing of the widened strip, have made this thoroughfare to vals along the boulevard for dressing purposes and when the entire project is complete Queen Street will be second to none in Lindsay.

If any criticism of the improved street were to be offered, it would be directed at the absence of a pedestrian path for a considerable distance along the south side. This undoubtedly creates a safety hazard by forcing pedestrians either to walk on the roadway or to cross to the opposite side of the street. Possibly the Board of Works could see its way clear to grade a pedestrian path on the south side and, if paving out at the moment, provide residents with a crusi stone footpath.

The next street widening project of any size in Lindsay will be along Lindsay St. South. This is a much needed improvement and may help to facilitate traffic. At the present time this street is very con-gested on days of heavy travel.

OTHERS SAY

BRICKS AND BRAINS

That there should be a strong tendency in achool managements towards putting money in bricks, stones and glass rather than into brains is not particularly surprising when you remember that the universities have been doing exactly the same thing for 50 years. But it should be remembered that the universities are doing a very different job in different circumstances oong a very discreent job in different circumstances and are under a good deal more computation than the schools. For one thing, they are in competition with one another, and many of them have to get their money from donors; and donors tike buildings that will hit the rival university smack in the eye.

The latest decree of fashion, we read, is that women should henceforth have thick eyebrows: the eyebrow plucked into a thin line is now as old-fash-ioned as the outlining of the eyes in black smut, which was fashionable when Theda Bara was queen of the silver screen. We are pleased about this news; we think that thicker brows will become many women.

think thicker brows will become many women. We give warning however, that thicker brows will make them look more menacing than they do now. The plucked brow made a girl look supercillous (a word whith, by the way, means merely "with lifted brows") and as though the semiled an escape of a word which, where the semiled an escape of the weak of the care; the anger of women is nothing to us, and anyhow, we have learned to look beneath of the semiled by the semiled which we have been a semiled by the semiled which we have been any the semiled by the semiled which will be some also who will make their brows too thick and black; achieving an unconscious resemblance to John L. Lewis, or perhaps George Robey. To them we ofter Shakespears's Shakespears's Shakespears's Shakespears's Shakespears's Shakespears's Shakespears's Corper Robey. To them we ofter Shakespears's Shakespears's Corper Robey. To them we ofter Shakespears's Corper Robey.

George Robey. To them we offer Shakespeare's coursel from The Winter's Tale:

Black brows, they say Become some women best, so that there be not Too much hair there, but in a semi-circle

Or a half-moon made with a pen.

'A half-moon made with a pen' cannot be bettered; avoid the effect of a scribble with a carpenter's pencil. -Peterborough Examine

GEOGRAPHY WRONG AGAIN

Education has come a long way during the past few decades, a transition not in what to teach and how to teach it but the school buildings are not the same as in the days when the Three R's comprised

the lessons and the school strap the law.

But the change has not stopped there. Back in those days, a student who could not name the seven oceans was a cluck, first grade. And now scientists oceans was a cluck, first grade. And now scientists and explorers tell us there are not seven oceans—just six. By some mistake the water around the south pole was once thought to be an ocean and was named Antarctic. Recenf exploration at the world's south limit has revealed that the Antarctic does not rate "ocean" status— Ontario Intelligencer

IT'S YOUR MONEY

IT'S YOUR MONEY
Quite a frus has been made over the more or
less regular anual transfers of public funds from provincial to municipal authorities. Mayor and aldermen
have been profuse in their thanks. There has been
much talk of gifts, generosity and po on. In some
much talk of gifts, generosity and po on. In some
confused themselves with a people seem to have
confused themselves with a first profuse of the conman and some state of the confused themselves with a first profuse of the conman and some state of the con-

The only Santa Claus in this, or any other ca where public funds are involved, is the taxpayer. He is the only contributor.

No matter what terms we use, these transactions

between provincial and municipal governments are merely transfers of money supplied by the taxpayer. And certainly to some of this municipal authorities have as much right as the provincial.—Financial Post

MONTREAL STORES OPEN FOR \$40 EACH

Last autumn Montreal city hall officials decided that all stores must close on all Quebec religious holidays. The first test case of the new by-law came on a December Saturday, Concepton Day. Nearly five hundred Montreal shops, defied the law and stayed open. They were all haled into court. Some 200 were open. They were all haled into court, some 200 me... fined the maximum of \$40 and costs, while others pleaded not guilty. They are still awaiting trial.

On May 22nd came the next of the four special of the court of the still state of the st

religious holiday: Ascension Day. Again many stores stayed open (More than a hundred plainclothesmen of a "shopper's squad" patrolled the city streets to

of a "shopper's squad" partolled the 'city streets to gather evidence against the shops.)

As a result of these holiday actions, all the major departmental stores in Montreal (accept Dupuis Perers) are taking court action contesting the validity upon Mayor House direction that the street of the on the dease of the city countriors when they me the the first week of November to consider the draft of the by-law. The court action taken by the big stores to test the by-law will be interesting. Big logal guns have been retained by the stores, by the city, and even by the Attorney-General of the Province, Premier Duplessis.—Peterborough Examiner

Laugh It Off...

Ezra went to the bank and asked for the loan of \$1. To the banker's surprise, Ezra gave him a \$0.00 government bond as security. Ezra renewed the loan each year. After three years the perplexed banker asked him just what the big idea was. "Well," replied Ezra, "It's a lot cheaper than renting a safe deposit box." Let's Have No More Tail Wags Dog

INFRA-BAKE BREAD IS BETTER---

because it's baked by

Infra-Red Rays!

rent Valley's INFRA-BAKE BREAD tastes better — and is better—because it's baked by INFRA-RED RAYS, an amazing new baking process which guarantees a whiter, finer-textured bread.

In our new modern INFRA-RED oven, rays transmit heat right to the centre of the loaf, baking the inside at the same time as the outside. Each loaf is baked to perfection and to a rich golden brown because the process is fully automatic.

Feel a loaf of INFRA-BAKE BREAD — you can tell it's fresher and will stay fresh longer. And the first taste will prove how wonderful it is.

Only five bakeries in the world use this revolutionary baking method. And one of them is right here in Lindsay.

| Treat your family to this delicious new loaf.

Yes...it's baked in Lindsay

OUR SALE ENDS THIS SATURDAY NIGHT so come in and take advantage of these and many mor-

PHONE - COME IN - WRITE

We're back from ... TEXAS!

We saw the moon over Houston--We saw the cattle and the cactus--But that's not why we went---

We went to see the Texan Gas men the men with Propane Gas know-how!

The Centre Truck is the one that made the epic trip!

Why We Made the Texas Trip

GAS 15 OUR ONLY BUSINESS AND NOT A SIDELINE, so we drove 3,000 miles to Trinity Steel Co. of Dallas, Texas, and spent many thousands of dollars to have our Bulk De-livery Tank and Consumer Storage Tanks built. These are shown in the photographs. The Chevrolet bulk delivery truck purchased from Chevrolet Dealer J. K. Hughes, now uses Propane Gas as Fuel instead of Gasoline. We invite you to look this over.

TOWN OR COUNTRY

Automatic Gas Heat is now available to you. Cooking, Heating, Lighting, Refrigeration, Hot Water Heating, Tobasse Curing, Fruit Ripening.

Bulk deliveries of Propane Gas Another Harding & Hayes first!

We can now bring you Propane Gas—the cleanest, safest fuel, at a low cost, for domestic, commercial and industrial use. For full information, write or phone

Our fleet of Trucks and fully trained Gas-men ready to serve you
